

Ensuring An Infectious Disease Workforce: Education And Training Needs For The 21st Century Workshop Summary

by Stacey Knobler; Institute of Medicine (U.S.)

Ensuring an Infectious Disease Workforce: Education and Training Needs for the 21st Century—Workshop Summary (2006). The ability of medical and public health workforce to respond to emerging infectious diseases is a critical component of the nation's public health infrastructure. This workshop summary, published by the Institute of Medicine (IOM) of the National Academies of Sciences, Engineering, and Medicine, provides a comprehensive overview of the current state of the infectious disease workforce and offers recommendations for addressing the education and training needs for the 21st century. The summary is based on a workshop held in Washington, D.C. in 2006, which brought together experts from various fields to discuss the challenges and opportunities facing the infectious disease workforce. The workshop was organized by the IOM and the National Center for Infectious Diseases (NCID) at the Centers for Disease Control and Prevention (CDC). The summary is available in both print and electronic formats.
